

Lime Stone

MOMO[®]tile

Lime Stone

The Lime Stone Collection is a profound material interpretation of the core aesthetics of Wabi-Sabi.

Inspired by the ancient and unadorned nature of limestone, its natural shadows, subtle granular textures, and inherent imperfections embody the Wabi-Sabi philosophy of embracing the passage of time and finding beauty in the flawed.

Through precision craftsmanship, MOMO Tiles has replicated this "story of the object," transforming the random, humble essence of aged stone into a vibrant, living foundation for modern spaces. More than just a material, it establishes the foundational visual language for contemporary Wabi-Sabi interiors.

Designed for the Modern Wabi-Sabi Context.

Stripping away overt ornamentation, this collection is anchored by a rich, low-saturation grey palette unique to limestone, offering an inclusive and serene background presence. Its distinctive matte finish and micro-granular texture create delicate interplays of light and shadow, cultivating an atmosphere of profound tranquility and depth.

Steel Mold + Digital Mold	Matt	900x1800x12mm	6	1.62	1	46

Installation Guidelines

- 1 . Adhesives : Always use professional-grade installation materials for fully vitrified porcelain products.
- 2 . Application : Suitable for both wall and floor applications.
- 3 . Joint Spacing : We highly recommend C2-grade tile adhesive or 325-grade cement. For wall installations, professional tile adhesive is mandatory. A joint spacing of 1.5–2mm must be maintained. Note: Tight-joint (groutless) installation is strictly prohibited, as thermal expansion and contraction can lead to hollowing and detachment.
- 4 . Grouting : Grouting or caulging is required for joint finishing.
